VOL. 4 NO. 12

LOMOND, ALBERTA, FRIDAY, OCT. 31. 1919

\$1.00 PER YEAR.

THE NEW SEED GRAIN REGULATIONS

A couple of weeks ago we published some information on the new seed grain regulations which were not in exact accord, but have since been handed a synopsis of the regulations by Bobbie Moir. The basic price is \$2.30 Fort William. Deducting the 18c. freight leaves the Lomond price \$2.12 on wheat grading one northern. The company selling this wheat must remit 15c. per bushel to the Canada Wheat Board. After November 30th. the elevator companies will be allowed 1c. per bushel additional for each fifteen days held in storage.

It is permissible for one farmer to sell his wheat to another for seed at whatever price they can agree upon.

There is at present at good supply of seed wheat at the Lomond elevators and it will be well for those who can to secure their supply as early as possible.

COMING EVENTS

The G. W. V. A. are advertising a Hard Times Dance to be held in the Paulson Hall at Travers on the anniversary of Armistice Day, Nov. 11th.

GREAT PROSPECTS FOR CANADIAN DAIRY INTERESTS

It is the consensus of Canadian officials who have visited Europe that the future of the export trade in Dairy products is assured. In England butter is everywhere at a premium and Canadian cheese continues to hold its good reputation. Mr. Arkell, Livestock Commissioner, who has recently returned from overseas, says the shortage of milk and dairy products in Great Britain is unprecedented. The scarcity and high prices of concentrated feed is

some extent responsible for this. The condition is so general as not to be quickly remedied. It partly responsible for retarding the increase of swine production and the restoring of the normal requirements of fat. NOTES

Funny, isn't it? Canada's army of four hundred thousand is now demobilized and yet the B. C. lumber camps are crying for men to man the camps this winter. The exodus of European labor is in some measure responsible for the shortage.

o o o

We imagine the U. S. miners' strike is about as popular, generally, as the British railway strike.

o o o

This may be Canada's last Victory Loan, but this is no reason why the common people should not be given the opportunity to share in future internal loans.

CARE OF THE TEETH

When teeth are on edge from eating acid fruits or drinking too sour lemonade, chewing cinnamon bark will give relief.

When teeth are stained with fruit juices, rub salt over them, and rinse the mouth with hot water. This will remove every trace of discoloration.

When pulp of teeth is exposed, mix equal parts of flexible colodion and strong carbolic acid. A small camel's hair brush is dipped into the mixture, freed from the unnecessary moisture, pressed into the hollow of the tooth.

A remedy for tooth ache.—Mix equal parts of hydrochlorate of cocaine, powdered opium, and menthol, with just sufficient glycerine and gum arabic to form a stiff paste. A piece the size of a pin's head to be placed in the tooth-hollow and to be kept in place with a piece of cotton-wool.

To prevent loose teeth.—Tannic acid two drams; tincture of iodine, one and one-quarter drams; iodide of potassium, fifteen grains; tincture of myrrh, one

and a quarter drams; rose-water, to make one pint. Mix one teaspoonful with two tablespoonfuls of warm water, and use as a mouth-wash night and morning.

How to whiten the teeth.—At times, in spite of one's efforts, there is an increase of tartar on the teeth, making them look yellowish instead of polished and pearly; and the best of tooth-powders seems then to lose its efficiency. To remedy this, dip an orange-wood stick into fine wood ashes and rub the teeth both on the inner and outer surfaces, when the tartar will disappear as though by magic. The operation should not be repeated too frequently, as it is apt to be hard on the gums.

'Twas like harking back to pre war days. The big crowd, the general spirit of geniality and light-heartedness, the extravagant decorations—which, by the way, were most pleasingly arranged—the bountiful supper and the general good management by the promoting element, the G.W.V.A., all combined, gave Lomond the most successful bit of social entertainment ever enjoyed by all those present. Everyone was most agreeably surprised by the number and beauty of the costumes, and the line-up of spectators was no mean fraction of the crowd. To Miss Kerr, L. H. Phillips and W. H. MR. MAN! Some reasons why Life Insurance is a prime Investment :::

Statistics show that out of 100 men at the age of 25 when they reach 65:

36 will be dead.

1 will be rich.

4 will be wealthy.

5 will be supporting themselves by work.

54 will be dependent upon friends, relatives or charity.

Eighty-five per cent. of men who have money at 35 lose it before they reach 65.

More than 60 per cent. of people who die leave nothing at all. 15 per cent. leave less than \$1000.00, and only 25 per cent. leave more than \$1000.00.

THE 1919 VICTORY LOAN The Bridge From War to Peace

No truer or more apt expression was ever coined than the above. The 1919 Victory Loan is truly a bridge which must be crossed before we can take leave of the past and devote ourselves to the work of re-construction. For five years all the strength of the world has been given to the supreme purpose of destruction. Our manhood; the wealth of our fields and factories; our mines, and ships have been organized to defeat a ruthless military power. Hundreds of thousands of producers representing our fittest men left their place in industry for active service overseas.

A great proportion of these men have now returned in various stages of fitness to re-enter civil life, and carry on their normal employments. The expense of bringing these men back, and the further expense of re-establishing them must be met by Canada. It is for this purpose, among others, that the 1919 Victory Loan is being placed before the people of Canada.

Canada owes it to the men who served its needs that they shall start life again with no unnecessary handicap; this is a debt of honor.

The nation that forgets these things will live under a regret that those who served it in its greatest crisis are at a disadvantage compared with those who stayed at home. Insofar as it does them really well, the worth of Canada will be judged by nations. We cannot tolerate the sight, so common after other wars, of soldiers who have been reduced to beggary. The good name of Canada has rested for years on the shoulders of the men who fought for her in Flanders. Now her good name rests on every citizen

of Canada, whether he be a returned man or one of those who stayed at home.

In fully subscribing for the Victory Loan within the boundaries of Canada, we save ourselves the necessity of going to another country for the money which we can raise ourselves if we will. Canada's progress can be financed by Canada. Canada's development can be done by Canadians. Canada's men must be re-established by Canada without outside help, and to do this Canada's 1919 Victory Loan must be subscribed for in full, within the boundaries of Canada by Canadians.

The spirit which placed Southern Alberta among the largest subscribers to previous loans of this nature still animates the people of Southern Alberta, and Southern Alberta's share of this loan will be subscribed in the same whole-hearted manner in which previous loans have been subscribed.

It is the duty of every patriotic Canadian to own a Victory Loan bond within the extreme limit of his power to purchase. We must remember, firstly, that the money will be used to discharge our debt of honor to the men who fought for Canada; secondly, that we are asked to lend money to our own government on terms that are both safe and profitable to ourselves with the best security in the world, namely: Canada and Canada's resources; thirdly, that our money will be spent with a view to making Canada more prosperous so that the burden of taxation may be lightened.

The bridge from war to peace can only be made absolutely safe if each one of us does his best to strengthen and support it.

See that you do your share.

The weather man has been rubbing it in somewhat of late. Just when we thought everything was fixed up for a general clear-up, a sudden change on Wednesday brought more snow and

cold. Alberta weather is as versatile as a vaudeville artist.

o o o

John Egle left on Wednesday for the coast to escape a cold winter.

Ward & DeForest Building Private Irrigation Plant

John Ward and John DeForest are undertaking the construction of an irrigation plant of their own that will give them water privileges on six hundred acres of land on their respective farms. Their land lies on the west banks of the Bow river, about three miles from Bow City. Their survey has been completed and work was begun on the main ditches before the present sitting of winter. Owing to the adaptable topography of their land they will be able to complete the work in time to use the water next spring should the season require it.

A pumping station will be constructed on the flats with a steam unit of a hundred and ten horse power. This will elevate an eight-inch stream to the necessary level, one hundred and eighty feet above the level of the river. The expenditure is estimated to keep within twelve dollars an acre, while the cost of operation will not exceed the ordinary water rental in established irrigation districts.

The success of this scheme will no doubt lead to the promotion of several more private enterprises along the Bow River.

INFORMATION ABOUT CHINA (Collected by Dr. Frank Crane)

From a little pamphlet published by a Missionary Society I pick the following facts:

China has the largest population of any country in the world,

one-fourth of all the world's people.

Shall we be able to introduce western civilization into China? There "China is the sea that salts everything that flows into it."

China has coal deposits as great as those of the United States and yet is still importing coal from Japan.

Chinese farmers get the largest yield per acre of any farmer in the world.

In some sections a large portion of the tillable soil is covered with the unmovable graves of ancestors.

In one year China exported 68,160 tons of peanuts.

In one year China are low. Women silk-reelers in Shanghai get from eight to eleven cents a day for eleven hours' work.

Steels workers in Hanyang, common laborers, get three dollars a month.

In 120 of China's silk mills, thirty-five per cent of the children employed are under fourteen years of age.

Cornflakes have been introduced into China; the first Chinese to eat cornflakes with chop sticks is entitled to the blue ribbon.

Moving pictures are popular in China, particularly of the slapstick kind.

China has one of the best postal systems. Rates are cheaper and deliveries more frequent in Canton than in New York.

Half of the World's cigarettes are smoked in China. After the expulsion of opium, \$5,000,000 worth of free samples of cigarettes were distributed throughout the empire.

The Chinese have practiced inoculation against smallpox since the eleventh century.

The Chinese invented printing before the west. Shanghai today publishes seventy-three newspapers.

Over ninety per cent of all the Chinese are illiterate.
